

## IPHONE 7.4 UPGRADE INSTRUCTIONS 5/10/12

To delete the current version press and hold the PatientKeeper icon until the screen shakes.

After the screen shakes the icons will begin to wave side to side and have an "x" next to them.

Click the X next to the PatientKeeper icon (PK53154R).

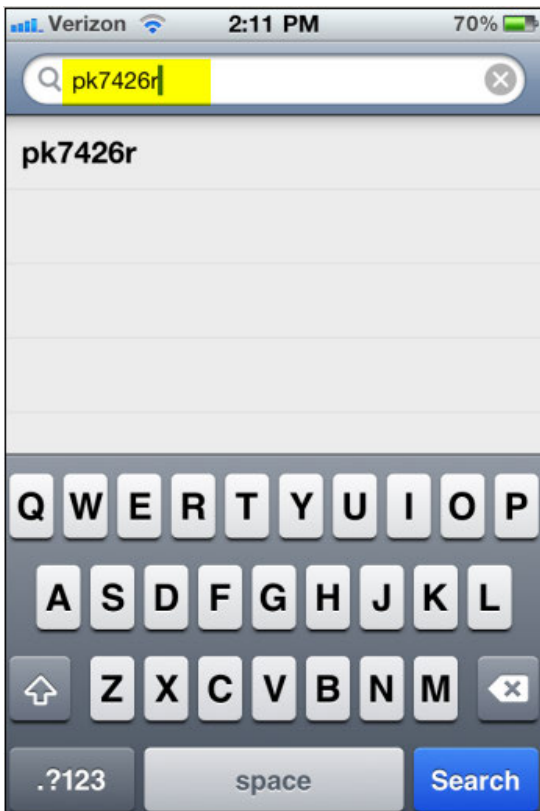

When prompted to delete PK53154R click Delete.

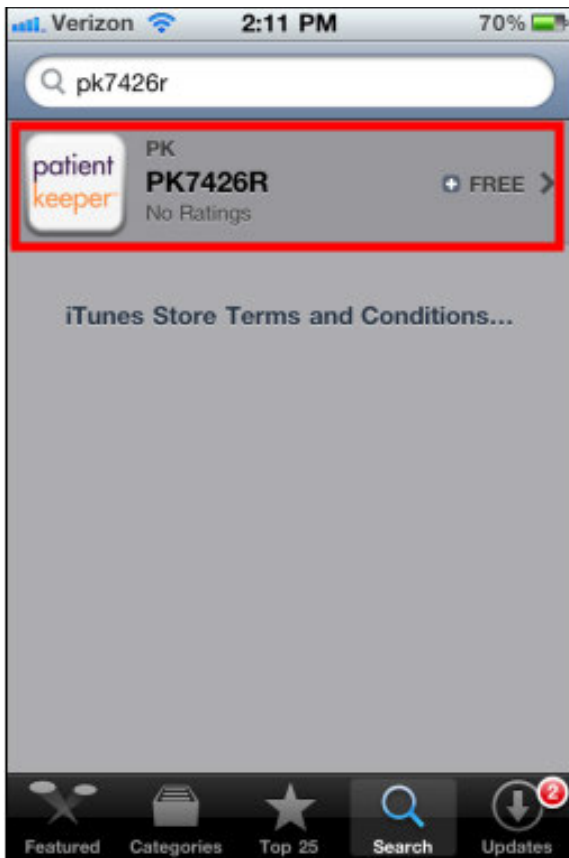

The main screen will be displayed with the wavy icons and the delete option. Press the menu button on the phone to regain normal operation.

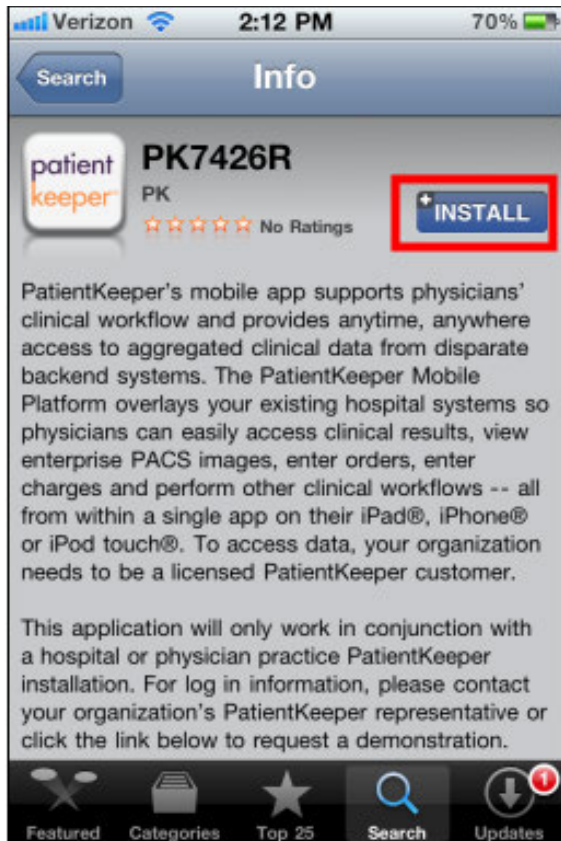

Open the App store and do a search for PK7426R

Select the PK7426R app

Click Install.

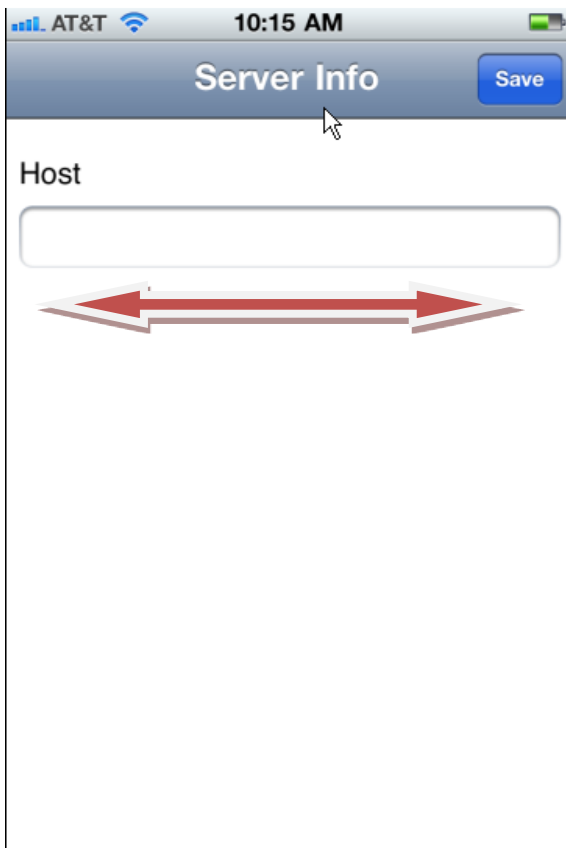

Once the app is installed launch the app by clicking PK7426R.

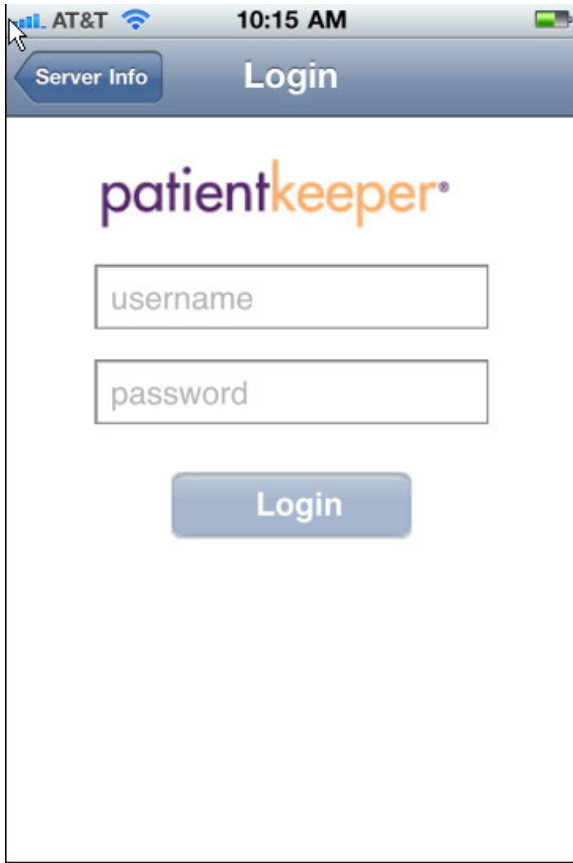

Enter and save the host name (A list of host names can be found in the Portal Device Connectivity Guide).

**South – dedv.mobile.medicity.net**

**North – mwdv.mobile.medicity.net**

Log in to PK.

The screenshot shows the mobile app interface for PatientKeeper. At the top, the status bar displays 'AT&T', signal strength, Wi-Fi, the time '10:15 AM', and battery level. Below the status bar is a dark blue header with a 'Server Info' button on the left and the word 'Login' in white text on the right. The main content area is white and features the 'patientkeeper' logo in purple and orange. Below the logo are two text input fields: the first is labeled 'username' and the second is labeled 'password'. At the bottom of the form is a blue 'Login' button.

User will be required to provision their device on the 1<sup>st</sup> login. After provisioning the device will sync and the patient list will be displayed.
